

Allsteel Acuity

Redefining comfort.

The Allsteel Acuity is so much more than its compelling good looks. It delivers in all aspects of performance and comfort, constantly yielding a healthier and noticeably better sitting experience. Acuity brings together refined, weight-activated automatic adjustments, a conforming mesh back and carrier combination, and a few easy-to-use manual controls. Its patented, weight-activated control mechanism and AccuFit dynamic back ensure that Acuity automatically adapts to each user, keeping seat and back moving in perfect harmony to produce constant lumbar, upper and lower back support, with no manual adjustment. The few, intuitive controls are clearly visible, easy to reach and easy to use. With just a touch of a finger, Acuity will adapt to every movement and every task with seamless effort and beauty. Since it was launched in 2008, Acuity has found its place as a market leader, receiving multiple awards and industry recognition for its innovative design. It has received the NeoCon Silver Award for Best Task Chair, Cradle to Cradle Silver certification from McDonough Braungart Design Chemistry, and the Indoor Advantage™ Gold award from Scientific Certification Systems.
