

## Allsteel Inspire

Enduring comfort for learning environments.

Allsteel Inspire meets the needs and aspirations of educational establishments, where concentration for long periods is a must – but not at the expense of design or reliability. Based on extensive field research, Allsteel Inspire incorporates macro and micro comfort solutions that work with every user's natural posture to provide long-lasting comfort and durability. The back pivot, which is compatible with reclining, provides essential lumbar support. Built-in suspension dampers allow the seat to adapt to different people, adjusting during use, responding to changing body movements, and promoting a healthy posture. The perforation patterns in the seat and the back work together, flexing, promoting airflow and dynamically adapting for lasting all-day comfort. Designed with sustainability in mind, Allsteel Inspire also combines a timeless aesthetic with reliable performance and patent-pending TriFit comfort technology. The range enhances any workspace and contributes to a healthier, more user-focused learning environment.
