

Campingaz

Scorpio 270 - innovation which matters

While focused on the development of a compact yet highly stable camping stove for trekking and outdoor sports the project team identified a series of product related innovations for Campingaz. Scorpio 270 has an entirely new multi-award winning (Compasso D'oro) product architecture which represents an innovative response to customer needs. The product is characterized by greater safety, stability and ease of use. Scorpio 270 and other products in the range also incorporate a newly invented "Easy-Click" (patented) snap & turn fixture system which works seamlessly with the pre-existing gas cartridge geometry.
